Five-Month Program Coordination

How a Sales Manager operated as a Program Manager across operational recovery, contract and Legal routing, refund control, and source-controlled executive reporting.

一位 Sales Manager 如何以 Program Manager 的方式，跨部門推進 operational recovery、合約與 Legal routing、refund control，以及 source-controlled 主管報告。

SANITIZED SUPERVISOR EXTRACT · NO PRIVATE SOURCE MATERIAL

One factual baseline. Six coordinated functions. Protected decision rights.

The program converted fragmented operational, contractual, commercial, and information risk into a visible owner-and-decision system without treating Legal, Finance, or Engineering conclusions as Sales decisions.

這個 program 把分散的 operational、contractual、commercial 與 information risk，轉成清楚可見的 owner-and-decision system；同時不把 Legal、Finance 或 Engineering 的結論當成 Sales 可以自行決定的事項。

CONTROLLED FILES
25-file package

Evidence boundary / 證據邊界

Personal coordination and routing are internal-record evidence (Grade C). The final diagnostic and controlled-package artifacts were directly inspected. This extract does not reproduce account identifiers, correspondence, contract language, names, amounts, or legal strategy.

EXECUTIVE CONCLUSION

What I did—and what I deliberately did not decide.

Strong program leadership creates control without impersonating specialist authority.

強力的 program leadership 是建立控制力，而不是冒充其他專業部門的決策權。

ACTION

Internal records place me as account coordinator / SPOC and record RMA coordination plus Legal routing. I maintained one factual baseline and a dated owner cadence.

Internal records 將我記錄為 account coordinator / SPOC，並記錄 RMA coordination 與 Legal routing；我維持一套事實基準及有日期的 owner cadence。

DECISION DISCIPLINE

I separated recorded operational recovery from formal technical closure and kept causation, liability, refund entitlement, and remedy with authorized owners.

我把已記錄的 operational recovery 與正式 technical closure 分開，並將 causation、liability、refund entitlement 與 remedy 留給授權 owner。

RESULT

Direct artifact: final diagnostic PASS after 32h12m. Internal record: reinstallation one day ahead and commercial requests routed. Direct deliverable: controlled management package.

直接 artifact：32h12m final diagnostic PASS；內部紀錄：reinstallation 提前一天及 commercial requests 已轉交；直接交付：controlled management package。

FOUR-STAGE OPERATING MODEL

From fragmented risk to decision control.

01 • STABILIZE

Build one factual baseline

Separate source, observation, inference, and open status.

拆開 source、observation、inference 與 open status。

02 • RECOVER

Coordinate operations

Connect diagnostics, repair readiness, delivery, and return-to-service cadence.

串接 diagnostics、repair readiness、delivery 與 return-to-service cadence。

03 • ROUTE

Protect decision rights

Send each technical, commercial, and legal question to its authorized owner.

把 technical、commercial 與 legal 問題交給具授權的 owner。

04 • CONTROL

Seal the management record

Maintain chronology, actions, corrections, audience rules, and integrity control.

維持 chronology、actions、corrections、audience rules 與 integrity control。

PGM transfer / 對 PGM 的直接證明

The same discipline transfers to demand-to-ship risk: one baseline, visible variance, named owner, authorized decision, and a dated next check.

CROSS-FUNCTIONAL EXECUTION

One program. Four risk tracks.

Coordination created speed and consistency; lane separation preserved accuracy and authority.

TRACK	PROGRAM WORK	CONTROLLED OUTCOME
01 · Operations Operational recovery	Coordinated RMA, repair, final diagnostic, delivery, and recorded reinstallation cadence. 協調 RMA、repair、final diagnostic、delivery 與 reinstallation cadence。	Recovery state documented; final technical disposition stayed with Technical / Engineering.
02 · Contract Legal routing	Reviewed the signed-source baseline, separated operative facts from interpretation, and prepared a clean chronology for authorized review. 檢視 signed-source baseline、區分 operative facts 與 interpretation，並整理 clean chronology。	Causation, liability, and legal effect remained outside Sales / Program authority.
03 · Commercial Refund control	Captured refund, complimentary PoC, and compensation requests; preserved the source trail; avoided unauthorized commitments. 記錄 refund、complimentary PoC 與 compensation requests；保留 source trail；不做未授權承諾。	Refund entitlement and any concession remained authorized-owner decisions.
04 · Governance Total report	Built a source-controlled management package joining chronology, action ownership, corrections, audience handling, and integrity control. 建立整合 chronology、owner、correction、audience handling 與 integrity control 的 management package。	The package documented the program; it did not manufacture legal or technical conclusions.

SIX COORDINATED FUNCTIONS

Shared baseline. Separate authority.

01 Account / Program Context, baseline, cadence	02 RMA / Engineering Diagnostics and disposition	03 Repair / Facility Physical work and site facts
04 Legal / Contracts Interpretation, liability, remedy	05 Finance / Commercial Refund and concession authority	06 IT / Security Access, retention, secure handling

CONTROLLED DELIVERABLES

A management record that can be checked, corrected, and handed off.

factual chronology

Documented in the program

- Operational recovery and return-to-service state were recorded.
- A 25-file controlled package, including its integrity manifest, was completed.
- Facts, open questions, owners, dates, and corrections remained distinct.
- Sensitive source material stayed outside the supervisor extract.

Retained by authorized owners

- Causation and facility root-cause conclusions
- Liability and legal interpretation
- Refund entitlement and commercial remedy
- Final technical disposition and formal closure

WHY IT MATTERS

Evidence of PGM readiness—not just account activity.

Visibility

Created a shared baseline for status, variance, owners, dates, and next decisions.

為 status、variance、owners、dates 與 next decisions 建立共同 baseline。

Execution

Maintained cross-functional cadence through recovery and management handoff.

在 recovery 與 management handoff 中維持跨部門 cadence。

Judgment

Separated supported facts from unresolved outcomes and protected specialist authority.

拆開有支持的 facts 與未定案 outcomes，保護專業 owner 的決策權。

Governance

Produced an auditable package with correction, distribution, and integrity controls.

產出具有 correction、distribution 與 integrity controls 的可稽核 package。

Distribution note / 傳閱說明

This is a newly authored allowlist-only supervisor extract. The private source report, signed agreement, original Legal referral, names, identifiers, amounts, correspondence, and legal strategy are intentionally excluded.
